

MEDICAL EDUCATION MANAGEMENT in 2019

The aim of this one day programme is to provide an overview of Medical Education Management in 2019.

With the constantly changing environment we hope this programme will be useful to those who are new to Medical Education Management as well as a refresher for those who have been involved for a while but have not had the opportunity to step back and reflect on what these changes mean for their team and their own practice.

By the end of the programme participants will be able to:-

- Have confidence in seeing where their particular area of practice fits into the wider field, at their own sites, and more broadly to the training of the future medical workforce
- Recognise the challenges/opportunities in the provision medical education management
- Network with colleagues to continue to share issues/ideas/solutions
